Ex Strategic Planner at BPJAMSOSTEK | Ex Junior System Analyst
Intern at DJKN | Bank Indonesia Scholarship Awardee | Full-Stack
Web & Mobile Developer | Graduate Informatics Engineering
Jakarta Pusat, Jakarta Raya, Indonesia

Ringkasan

I am a final-year Informatics Engineering student at Universitas Trilogi with a strong interest in Web Development and Mobile Development. I am also developing myself as a full-stack developer, handling projects related to web development and mobile development. I am passionate about building digital solutions that are functional, user-friendly, and able to solve real-world problems. Throughout my academic journey, I have been involved in HIMATIKA, particularly in scientific research activities, had the opportunity to serve as a Co-Lead of GDSC, and am currently active in the GenBI Jakarta community with a focus on public education initiatives. I have also participated in various external activities, including technology seminars, collaborative projects, and volunteering programs. These experiences have helped me develop not only technical skills, but also communication, teamwork, leadership, and problem-solving abilities. As I approach the final stage of my undergraduate studies, I continue to improve my skills in software development, especially in web and mobile-based applications. I enjoy learning new technologies, working on meaningful projects, and contributing to community-based tech initiatives. Currently, I am open to internship opportunities, web development and mobile development project collaborations, and professional experiences that allow me to grow as a developer and contribute positively through technology.
